

Chart for Car seat minimum/maximum weights as of 10/18/11

Many of the restraint manufacturers are now stating that children **MUST** be a certain age to be forward facing. (e.g. 2+)

The American Academy of Pediatrics recommends that children ride to the maximum weight & height limits of the child restraint and that they ride in a child restraint with a harness to the maximum weight & height limits of the harness. **(In the back seat of the vehicle)**
